H. Reading Comprehension :

The economic and social changes of the past few decades have changed the European family. What was once normal-two parents, father employed, mother at home, stable financial situation is now exceptional. Today, half of all marriages end in failure, and about half of all children spend several years in a single-parent family. Some mothers never marry again, some parents lose husband or wife through death and some single women and men adopt children. It means that they decide to raise other people's children. Single mothers are greater in number than single fathers.

A single-parent family is at a greater risk for such negative outcomes as decline in income, poverty, and behavioral problems. Most single parents find it difficult to meet all their financial duties. A decrease in income may require **them** to move the family to a less expensive home in a different neighborhood, transfer the children from one school to another, and spend less money on goods.

While the pressures on the single-parent family are great, problems do not always occur. If a single mother can manage the different tasks of taking care of her children and herself, her family can not only survive but also advance a lot.

27- What is the first paragraph mainly about?

a) The problems of today's children
b) Ways to help single-parent families
c) Recent economic and social changes in Europe
d) The change in the structure of the European family

28- According to the passage, in the past a normal European family had …….

a) so many children
b) no financial problems
c) people to take care of the children
d) a father at work and a mother at home

29- The word "them" in paragraph 2 refers to …….

a) duties b) problems c) single parents d) negative outcomes

30- According to the passage, a single-parent may transfer his or her child from one school to another when …… .

a) they move to another home
b) they have financial problems
c) they want to be close to shops
d) their children do not do well at school
