In some places, the ground doesn't have all the important things that plants need, especially nitrogen. Animal meat has a lot of nitrogen. So some plants eat meat to get what they need. The venus flytrap grows in dry parts of the USA. Its leaves are like the pages of a book. They can open and close very quickly. Inside the leaves, there are three small hairs. If an insect touches one of them, the leaf close quickly and the insect can't get away. In about half an hour, the leaf presses the insect untill it is dead. The plant covers the insect with special liquid and eat it slowly.</i></p> <p>True (صحیح) or false (غلط)?</p> <p>28. Flytrap is a type of insect.</p> <p>29.
